♂ Male

SUMMARY

Software Developer with a strong foundation in Computer Science and hands-on experience building web applications using Django, HTML, CSS, and JavaScript. Skilled in designing efficient database systems and developing scalable backend architectures. Experienced in solving real-world problems through project-driven development, with a focus on writing clean, maintainable, and efficient code.

LANGUAGES

English ● ● ● ● ●

EDUCATION

B.E. Computer Science and Engineering

P.A. College of Engineering and Technology

2022 – 2026 | Pollachi, Tamil Nadu

- CGPA: 7.69(up to the 8th semester)
- Developed projects during academics: Student Management System, Bus Scheduling System

SKILLS

- **Languages:** Python, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** Django, React.js
- **Databases:** MySQL, PostgreSQL
- **Core Concepts:** OOP, Data Structures & Algorithms,
- **Version Control & Development Tools:** Git, GitHub, VS Code
- **Analytics & Visualization:** Power BI, Tableau
- **Design Tools:** Figma
- **Emerging Technologies:** AR/VR

PROJECTS

STUDENT MANAGEMENT SYSTEM

03/2026 – Present

- Engineered a role-based web application for managing attendance, timetables, and student records
- Implemented authentication and role-based access control
- Technologies: Django, SQLite, HTML, CSS, JavaScript

ABNORMAL CROWD BEHAVIOUR DETECTION USING SWARM INTELLIGENCE & ENSEMBLE LEARNING

02/2026 – 03/2026

- Built an abnormal crowd behavior detection system using machine learning and computer vision
- Technologies: Python, OpenCV, Scikit-learn

BLOG APPLICATION (Personal Project)

01/2026 – 02/2026

Developed a blog application with authentication and CRUD functionality using Django

- Technologies: Django, MySQL, HTML, CSS

TWITTER BOT DETECTION

08/2025 – 08/2025

- Developed a machine learning model to detect bot accounts using behavioral data
- Applied classification algorithms to improve detection accuracy
- Technologies: Python, Scikit-learn, Pandas, NumPy

VANDI BOND – Bus Scheduling System (Prototype)

03/2025 – 04/2025

- Designed a frontend prototype for a bus scheduling system with basic scheduling logic and workflow visualization

Higher Secondary

JSR Higher Secondary School

2020 – 2022 | Madathukulam, Tamil Nadu

- Completed Higher Secondary (2022) with 77.5%

Secondary School

JSR Higher Secondary School

2020 | Madathukulam, Tamil Nadu

- Completed Secondary School (2020) with 84.4% under State Board

- Technologies: HTML, CSS, JavaScript

COURSES

AR/VR Value Added Course

P.A. College of Engineering and Technology

- Completed training on basics of Augmented and Virtual Reality

Python for Beginners

Udemy

- Covered core Python concepts including data types, loops, and functions
- Strengthened understanding of programming fundamentals

PUBLICATIONS

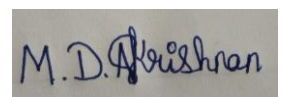

Swarm Intelligence-Based Segmentation and Ensemble Learning for Abnormal Crowd Behaviour Detection

International Conference on Digital Technologies and Smart Engineering Systems (ICDTSES), National Institute of Technology Puducherry
27/02/2026

- Presented a research paper on abnormal crowd behavior detection using swarm intelligence and ensemble learning
- Analyzed crowd patterns using segmentation and machine learning techniques
- Collaborated with a team for research development and presentation at an international conference

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
